⚡ AXE 1 — Micro-services techniques à forte valeur (cash rapide)

🛡️ 1. Audit Sécurité & Perf Django / Nginx

Tu as déjà :

- analyse Nginx
- rate limit
- bots/flood
- logs
- optimisation stack

👉 Offre packagée :

“Audit Express Web Stack (Django / Node / Nginx)”

Contenu :

- Analyse config serveur
- Détection failles perf & sécu
- Rapport PDF clair
- Plan d'actions priorisé

💰 Tarif :

- 290 € audit light
- 590 € audit complet

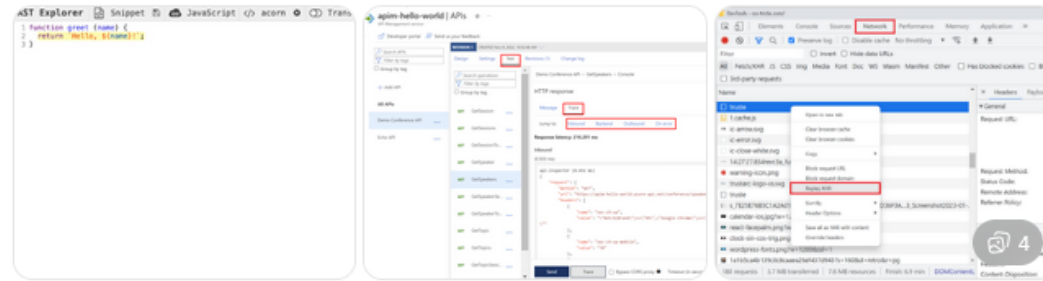

🕒 Toi : 2 à 4h avec tes outils

✅ Client : énorme valeur perçue

Ça se vend très bien aux :

- startups
- SaaS early stage
- agences web

2. Service "Reverse JS / API Discovery"

Tu bosses déjà sur Unminify + JS analyzer.

Produit vendable :

“Cartographie technique d’une application web”

Tu fournis :

- Liste des endpoints API détectés
- Flux XHR
- Dépendances JS
- Complexité front estimée

💰 190 à 390 € par analyse

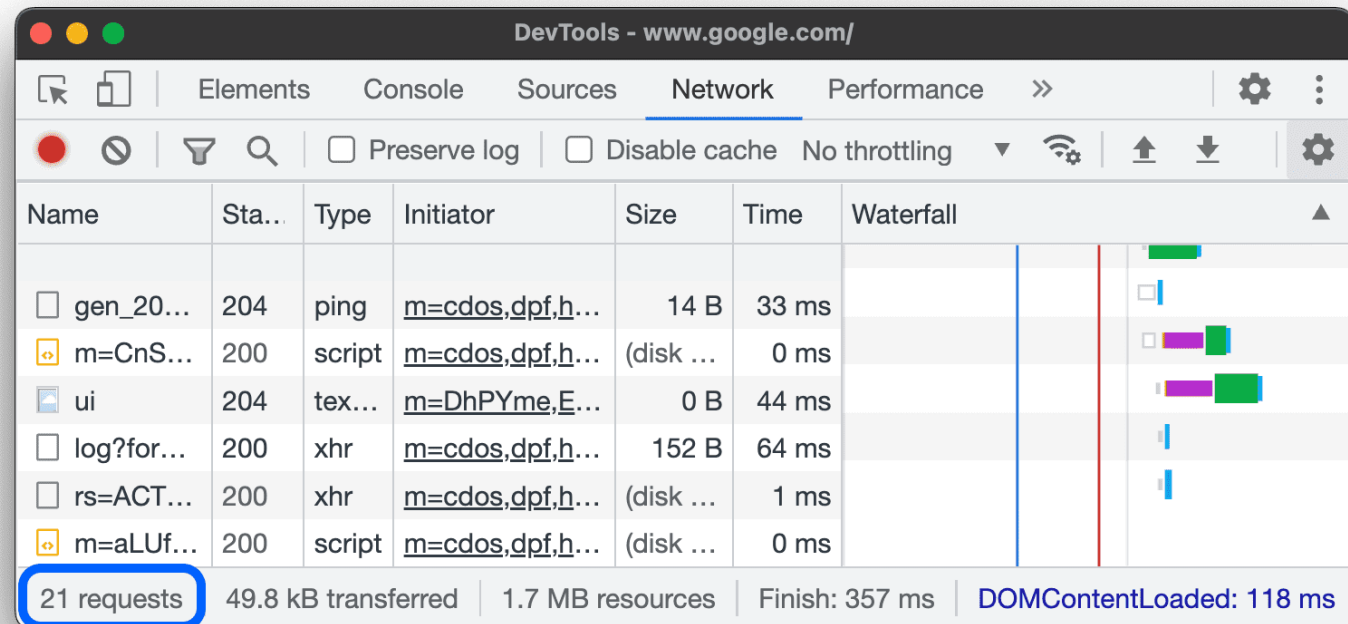

🎯 Cible :

- investisseurs qui veulent comprendre une app
- entreprises qui rachètent un outil
- équipes qui reprennent un projet legacy

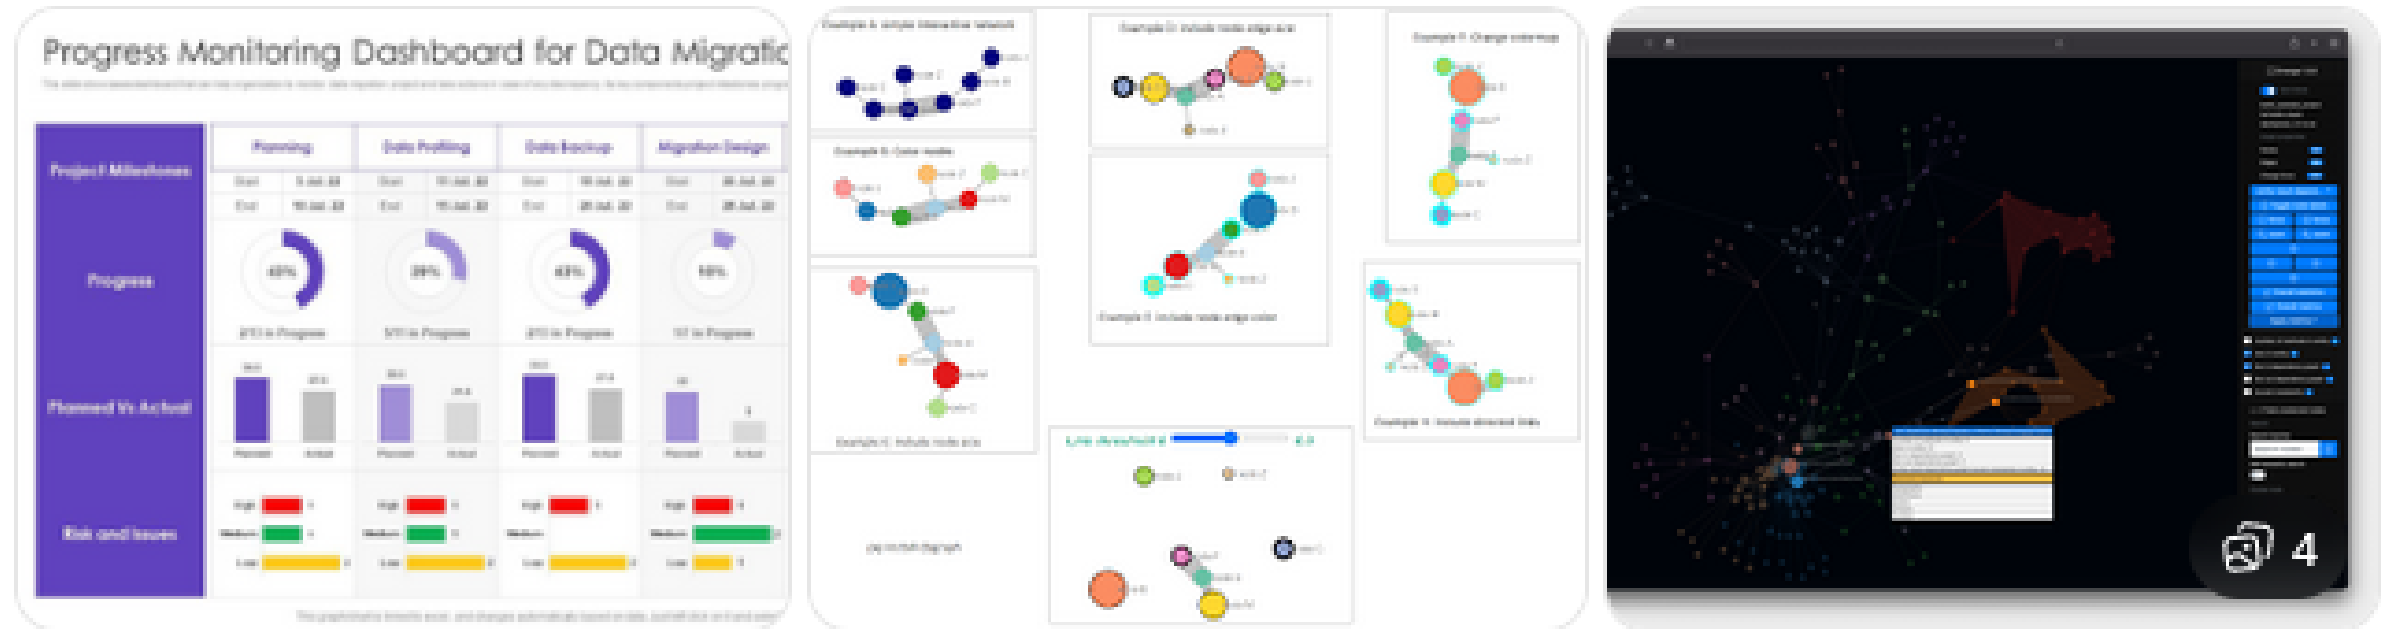

Très niche → très différenciant.

AXE 2 — Outils payants “low friction”

- 3. **Migration Doctor PRO** (version premium)
- 4. **LogDoctor SaaS**

3. Migration Doctor PRO (version premium)

Version gratuite = diagnostic simple

Version PRO =

- Analyse avancée
- Détection conflits migrations
- Graph visuel

🔥 4. LogDoctor SaaS

Tu prends ton outil logdoctor

Tu le transformes en :

Upload logs → Analyse → Rapport auto

Pas besoin d'énorme infra :

- limite taille fichier
- traitement async
- PDF auto

💰 9 € / analyse

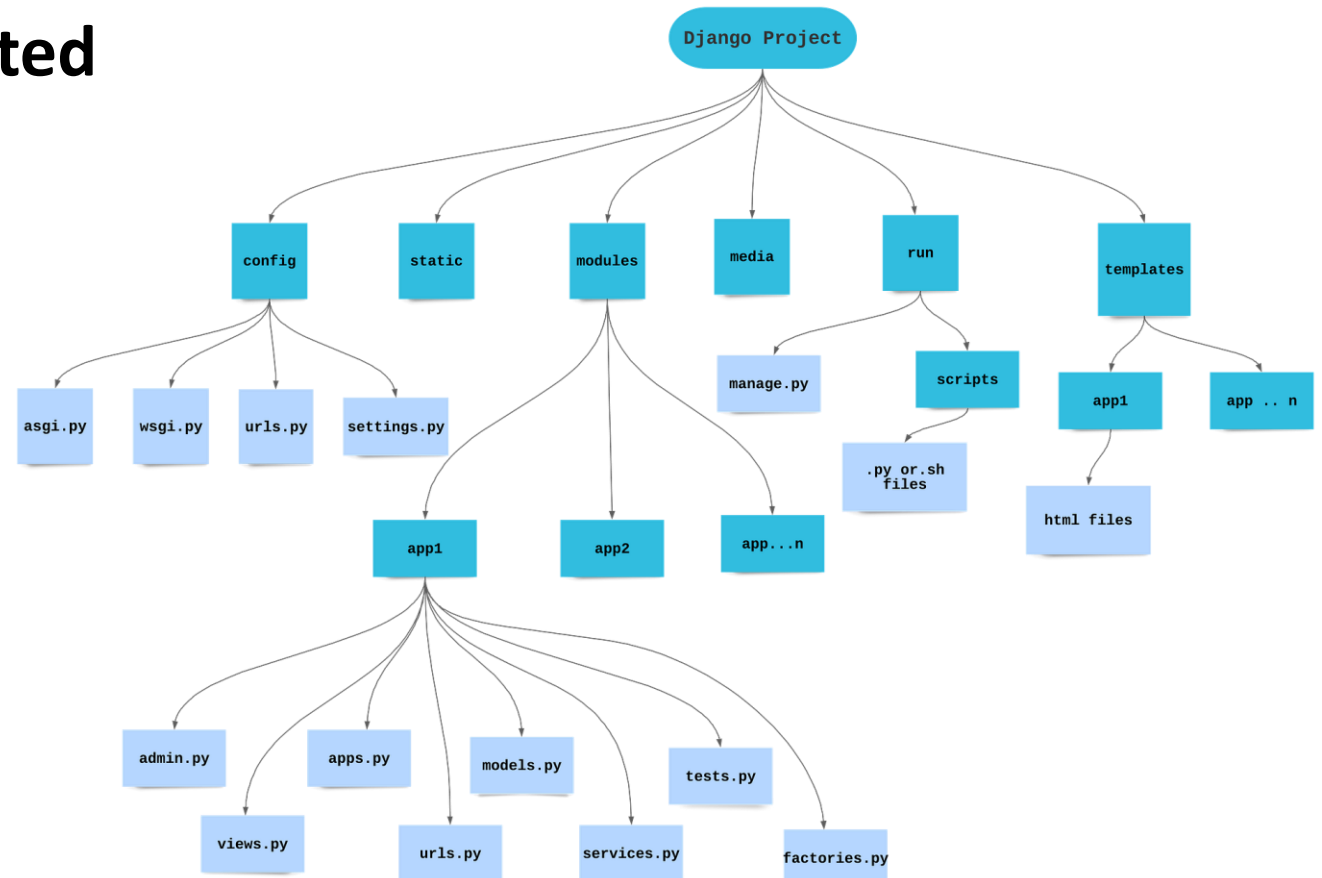

ou 19 €/mois pack

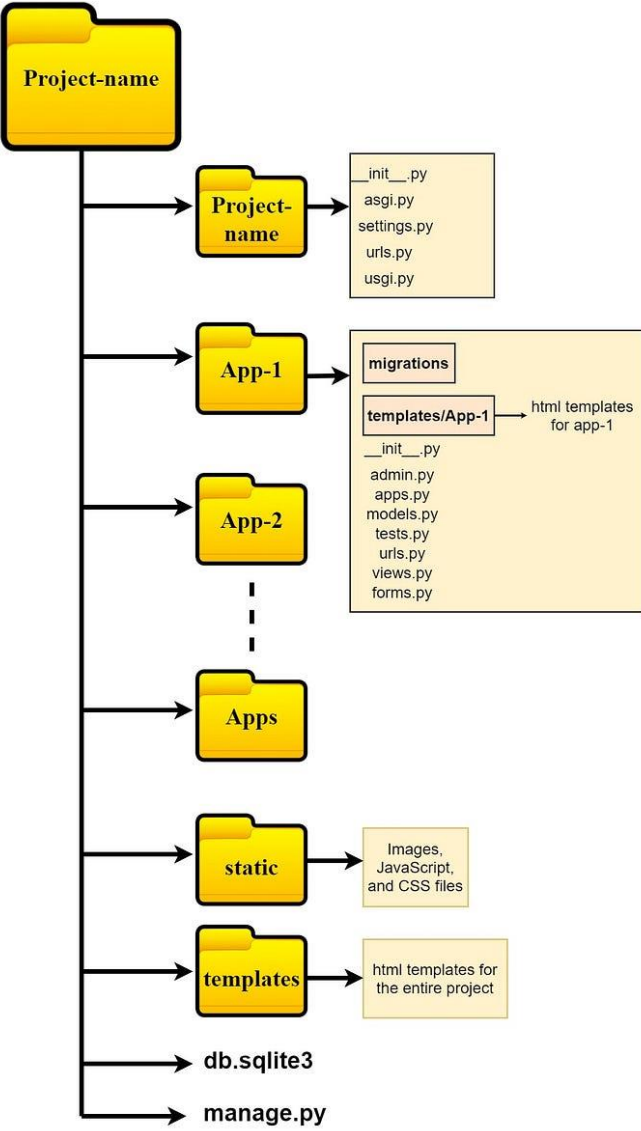

Cible :

- freelances
- petites boîtes sans DevOps

AXE 3 — Packs techniques prêts à l'emploi

- 5. Pack “Django Production Ready”
- 6. Mini Weglot-like Self Hosted

280 Live Contact Info Updates with Notifications

Funs Janssen

2 Comments Add Tag

State **Committed** Area My Businesscard
Reason Commitment made by the Iteration My Businesscard\Sprint 6

Description

As a user, I want to receive real-time updates when my contacts change their information, because it ensures I always have the most current details for communication.

Description

- Develop a system to automatically notify users when their contacts update phone numbers, email addresses, or other relevant details.
- Deliver live updates directly to users' contact lists to avoid manual data entry and ensure accuracy.
- Include detailed information in notifications specifying what was changed along with the timestamp of the update.
- Provide users with options to accept, ignore, or flag updates directly from the notification interface for streamlined management.
- Implement a contact history log that records all changes with timestamps and user actions to maintain an audit trail.

Context

- This feature is designed to help professionals maintain accurate contact records and reduce communication errors caused by outdated information.
- It is primarily targeted at applications with contact syncing capabilities, such as CRM systems and messaging platforms.
- User consent is mandatory for sharing contact updates, ensuring compliance with privacy regulations.
- All communications related to contact updates must be securely encrypted to protect user privacy and data security.
- The implementation aligns with existing notification preferences, supporting silent, push-only, and in-app notification options.

Acceptance Criteria

- Send notifications to all users who have a contact saved whenever that contact updates their information.
- Ensure notifications clearly specify which field was changed and display both old and new values.
- Allow users to accept, ignore, or flag updates directly from the notification interface.
- Immediately update the user's contact list with changes that are accepted.
- Keep ignored updates unapplied but accessible for later review.
- Trigger a review or security alert workflow when updates are flagged (optional for MVP).

Details

Priority

Effort

AI Assistant

Checklist

1. Definition of Ready 100%
4 of 4 completed

2. Definition of Done 33%
2 of 6 completed

The application loads in under 2s

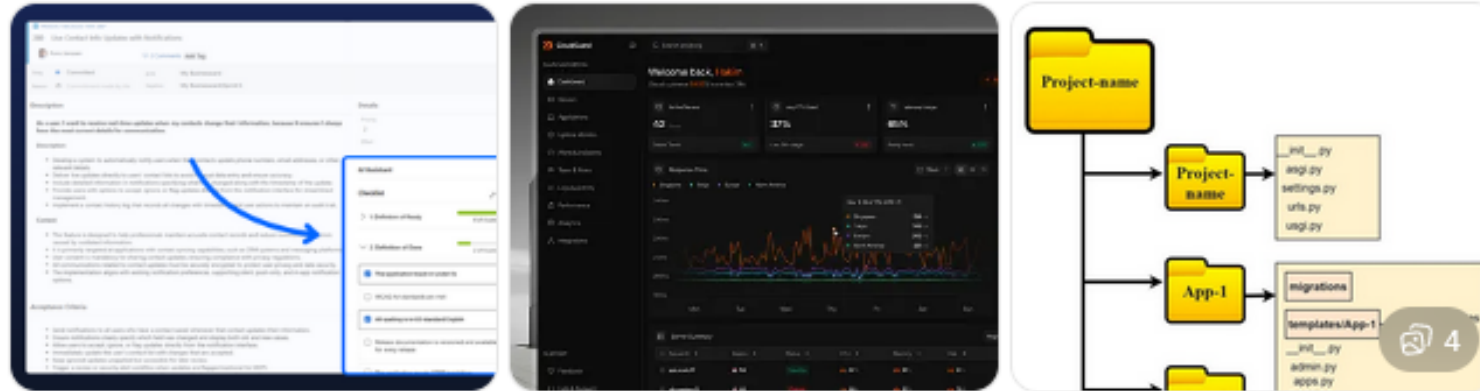

WCAG AA standards are met

All spelling is in US standard English

Release documentation is versioned and available for every release

The application meets GDPR legislation

📦 5. Pack "Django Production Ready"

Un kit téléchargeable :

- settings.py prod sécurisé
- config Nginx optimisée
- rate limit prêt
- systemd + gunicorn
- checklist déploiement

💰 39 €

🎯 Marché énorme : tous les devs Django qui galèrent à passer en prod

6. Mini Weglot-like Self Hosted

Tu crées une version ultra simplifiée de ton moteur de trad :

- JS snippet
- DB locale
- 1 langue
- cache simple

 49 € licence

 Tous les petits sites qui veulent traduire sans abonnement

Même si c'est simple → énorme demande.

A glowing blue brain with neural connections, set against a dark blue background. The brain is rendered in a semi-transparent, wireframe style, showing the intricate network of neurons and synapses. The lighting is soft and ethereal, highlighting the contours of the brain and the density of the neural pathways.

AXE 4 — Services “cerveau”

7. Audit Architecture Web

Tu analyses :

- stack
- dettes techniques
- risques scalabilité

Rapport clair pour CTO / fondateur non technique

💰 490 – 990 €

Tu fais ça 2 fois/mois → ton loyer respire.

STRATÉGIE GLOBALE

Objectif court terme :

👉 500 à 1500 €/mois via petits produits + audits

Objectif moyen terme :

👉 transformer les outils qui marchent en SaaS

Objectif long terme :

👉 Ideo-Lab = plateforme d'outils techniques pour devs & startups

STRATÉGIE GLOBALE

Objectif court terme :

👉 500 à 1500 €/mois via petits produits + audits

Objectif moyen terme :

👉 transformer les outils qui marchent en SaaS

Objectif long terme :

👉 Ideo-Lab = plateforme d'outils techniques pour devs & startups

Le mindset à garder

Tu ne manques pas de compétence.

Tu manques juste de **canal de monétisation structuré**.

Au lieu de :

| vendre 10 jours de ta vie pour 1000 €

Tu peux :

| vendre 100 fois un outil à 29 €
